PRAKARSH'S ANGRY BIRD SPACE GAME

The game that I have made is based on The Angry Bird Space Game by Rovio Entertainment Cooperation

(https://play.google.com/store/apps/details?id=com.rovio.angrybirdsspace.ads&hl=en_IN)

Angry Bird is a fantasy based media franchise. The series is focuses on multi colored birds that try To defeat the green coloured pigs, their enemies. The birds are actually trying to take back their islands that the enemy pigs had captured years ago.

Help the birds take back their homes from the pigs by killing the pigs.

I was even inspired by the angry bird game that we made from c23 to c33.

This game mainly has two stages with four levels each. The fourth levels of both the stages is a special level known as Boss Fight.

The game has mainly three playing characters :

• Angriest Angry Bird known as RED
• Fastest Angry Bird known as CHUCK
• Most Powerful Angry Bird known as TERENCE

All the characters even have their special power in the game.

RED   CHUCK   TERENCE

There are mainly two types of Pig:

- The small pigs who are easy to defeat but are in large numbers
- The boss pig who are very difficult to defeat hence only two in the 4th level of both sarges

There are even many objects like boxes, logs, triangles that are used to protect the pigs.

There is also a background music which is the theme song of the movie Angry Birds which goes on and on. There's even a special sound affect when you drag and release the slingshot

In the beginning of the game you see a picture with "WELCOME TO ANGRY BIRD SPACE " written on it followed by another image with "LEVEL 1" written on it

In each level you just get one chance from any one of the birds. If you are able to finish all the pigs in that level then only you are able to move to the next level.

If you complete the 1st stage it shows another image with "LEVEL 2" written on it.

If you are not able to complete any one of the level (in both stage 1 and 2) in that 1 shot then you don't get any other shots. You just have one option that is to press the reset button and go back to the first level of stage 1.

If you are able to complete all the 8 levels then you are acknowledged as a winner in the end as it is really very difficult to complete the whole game.
